Abstract (en)

[origin: EP0056936A2] The container having a device for extending and retracting the stick-shaped product is characterised in that the container has a longitudinal slot (8) in one side of its longitudinal part and an exit aperture (5) in its semicylindrical top part, and in that the device has in the said longitudinal slot a displaceable slide knob (7), to which there are attached in the inside of the container on the one hand a flexible tape (6), which opens and closes the exit aperture (5) when the slide knob is displaced, and on the other hand the one end of a further flexible tape (12) which is attached by its other end to the stick bearer (13) in such a way that the exit aperture (5) is opened or closed when the slide knob (7) is displaced and, at the same time, the product stick is extended or retracted. Provided in the interior of the container between the longitudinal slot (8) and the stick (10) is a fixed partition (9). <IMAGE>
