Abstract (en)
[origin: EP0057124A2] 1. Folding furniture unit comprising a support base (1), a seat (6, 6a, 13a) and a seat-back (7) so as to constitute a chair when it is unfolded, in which the seat-back is articulated with respect to the support base (1) along an axis (XX) located substantially in the plane of the seat (6, 6a, 13a) substantially at a point mid-way between the front and rear legs (2), between the unfolded position in which the seat-back (7) extends in a direction away from the support base and a folded position in which the seat-back (7) is folded-back against the support base (1), in which case the furniture unit constitutes a stool whilst a connecting member (6, 13a) secured to the seat-back (7) joins this latter to its axis of articulation (XX), characterized in that the connecting member (6, 13a) is constituted by at least part of the seat (6, 6a, 13a).
