Abstract (en)  
[origin: WO8200462A1] Cyano-guanidines having imino-alkyl and amino-nitrile structures, characterized by the general formula: (FORMULA) wherein R is an alkyl residue from 1 to 5 carbon atoms, or wherein R<u1>u is the residue 2-((2-guanidino-4-thiazolyl)-methylthio)-ethyl, or wherein R<u1>u is the residue 2-((5-dimethylamino-methyl-2-furan yl)-methylthio)-ethyl, or wherein R<u1>u is the residue 2-((3-methoxy-2-pyridinyl)-methylthio)-ethyl, or wherein R<u1>u is the residue 2-((3-ethoxy-2-pyridinyl)-methylthio)-ethyl. Various methods for synthesizing imino-alkyl and amino-nitril cyano-guanidines are presented in 1.

Abstract (fr)  
Cyano-guanidines de structure imino-alkyle et amino-nitrile, caracterisees par la formule generale: (FORMULE) dans laquelle R est un reste alkyle de 1 a 5 atomes de carbone, ou dans laquelle R1 est le reste 2-((2-guanidino-4-thiazolyl)-methylthio)-ethyle, ou dans laquelle R1 est le reste 2-((5-dimethylamino-methyl-2-furanyl)-methylthio)-ethyle, ou dans laquelle R1 est le reste 2-((3-methoxy-2-pyridinyl)-methylthio)-ethyle, ou dans laquelle R1 est le reste 2-((3-ethoxy-2-pyridinyl)-methylthio)-ethyle. Differentes methodes de syntheses des cyano-guanidines imino-alkyle et amino-nitrile presentees en 1.
