Abstract (en)
1. A hand mixing gun for the simultaneous extrusion of two low to highly viscous liquids out of a cartridge device containing two liquids separately, in which cartridge device a discharge piston (2) is displaceable for each liquid, with a receiver for the cartridge device, a mixing tube (4) to which the outlets of the cartridge device can be connected and which has an outlet nozzle (6) for the mixed liquids, two piston rods (3) which can be pushed into the cartridge device from the side opposite to the outlets of the cartridge device to push the discharge pistons (2) forwards and a drive motor (9) to move the piston rods (3), wherein the cartridge receiver is adapted to store two cartridges side by side, characterized in that a change-speed gear (8) is provided, which permits the drive of the two discharge pistons (2) at feed speeds, the ratio of which to one another can be preset in order to produce a desired mixing proportion of the two liquids.

Abstract (de)
Gegenstand der Erfindung ist eine Hand-Mischpistole für Klebstoffverdichtungsmassen und dergleichen, die aus zwei Komponenten erst unmittelbar vor dem Auftrag zusammengemischt wegen. Zu diesem Zweck besitzt die Pistole eine Aufnahme für zwei handelsübliche, die beiden Komponenten getrennt enthaltende Kartuschen und einen Antrieb mit einstellbarem Wechselgetriebe, der es erlaubt, je nach dem für die beiden Komponenten erforderlichen Mischungsverhältnis die beiden Vorschubkolben der beiden Kartuschen mit unterschiedlicher Geschwindigkeit vorzuschieben.
