Abstract (en)

[origin: EP0057833A1] 1. A window or door, preferably a pivoted window or pivoted door, having mounting members (5, 26) which are disposed in the corner regions of the spaces between the fixed frame and the sash frame, characterised in that the one-piece mounting members which are provided with two limb portions (7, 8; 29, 33) extending perpendicularly to each other are fixed in position exclusively by means of a clamping screw (9, 27) which bears with its free end against a wall portion and/or the bottom portion (12) of a receiving groove (13) of the fixed frame and which is passed through a screwthreaded bore (10, 28) extending at an acute angle to the longitudinal central plane (11) of the mounting member, both limb portions engage into a receiving groove in the fixed frame (2) and, at a longitudinal edge, have hooking projections or hooking web portions (15, 30) and (21, 41) which, when the clamping screw is tightened, engage behind an edge bar portion of the receiving groove.
