Abstract (en)

[origin: US4469029A] This work station is comprised of support legs (P) with a stable support base (1a) and uprights (1b) on which pivoting elbows are adapted to form adjacent arms (2a-2b) which are positioned and locked in place in an adjustable angular manner at one end of these arms, the other end bearing supports or work tops (3 and 4) positioned and locked in place in a manner which can be angularly adjusted at will, so that these supports or work tops (3-4) allow effects and uses which are multiple and can be combined together.
