Abstract (en)  
[origin: EP0058143A1] A prefabricated balcony for detachably mounting on the facade of a building comprises a front wall (11), side walls (12) and a floor (13) forming an integral unit made of a reinforced plastic material. At the side facing the building, the side walls and the floor are formed with side flanges (16, 17), the flanges (16) of the side walls connecting at their upper end to the ends of a substantially horizontal top flange (14) projecting outwardly from the side and front walls of the balcony. The balcony is secured to the building and supported by means of cantilever structures (21) each having one leg portion lying against the lower side of said top flange (14) and the other leg portion against the side flange (16) of one side wall.
