Abstract (en)

1. A consumer package which comprises a substantially rectangular cardboard card (3) which is stuck together in a double-ply configuration, with a transparent container (2) of plastic material, which is arranged in the region of one half (7) of the cardboard card and which provides a space for accommodating the article for sale, said container having a rectangular end portion which projects forwardly out of an opening (8) in the front cardboard ply (5), which corresponds to the size of the container, and having an outwardly bent flange edge portion (2a) which engages behind the edge portion of the opening (8), the container being closed at its opening by the rear cardboard ply (6), wherein the adhesive join between the cardboard plies (5, 6) leaves the transparent container (2) free and the side edge (11) of the transparent container (2), which is towards the other half (10) of the cardboard card (3), extends transversely with respect to the cardboard card (3) and the associated side edge (9) of the opening (8) in the front cardboard ply (5) is extended on both sides in the form of a perforated breakage edge (11a and 11b respectively) as far as the associated side edge (3a and 3b) respectively of the cardboard card (3), and wherein the rear cardboard ply (6) has weakenings in its cross-section in the region of the side edge (9) of the opening (8), which is towards the other half (10) of the cardboard card (3), to provide easier access to the space accommodating the article for sale, characterised in that the weakening in the cross-section of the rear cardboard ply (6) extends along the side edge (9) of the opening (8), which is towards the other half (10) of the cardboard card (3), and is formed as a fold edge (12) which is adjoined on both sides, in such a way as to extend in line with the edge (9), by a respective punched-out projection portion (13a and 13b respectively) which projects into one half (7) of the cardboard card (3) and which extends in regard to its width as far as the associated side edge (3a and 3b respectively), the length of said portion (13a, 13b) being at most equal to its width.

Abstract (de)

Eine Verkaufspackung besteht aus einer zweischichtig zusammengeklebten Kartonkarte (3) mit einem im Bereich der einen Hälfte befindlichen, vorn herausragenden Klarsichtbehälter (2), der mit einem Flanschrand (2a) den Rand einer ihn aufnehmenden Ausnehmung (8) der Kartonkarte hingegreift und an seiner Öffnung durch die hintere, mit Vorkehrungen zu einem erleichterten Zugang zum Behälter versehene Kartonschicht (6) abgeschlossen ist. Trotz Beibehaltung einer leichten Zugänglichkeit kann diese Verkaufspackung auch schwerere Verkaufsgegenstände, wie z.B. Zündkerzen, selbst nach ihrer ersten Öffnung wieder sicher aufnehmen.
