Abstract (en)  
[origin: EP0058883A1] The roller-blind comprises a blind cloth (1), a winding roll (6) for winding up said blind cloth (1) thereon, a coil spring (7) which acts to constantly rotate said winding roll (6) in the cloth winding-up direction, a stopper (10) for stopping the rotation of said winding roll (6) against the action of said coil spring (7) at any desired position into which said blind cloth (1) is lowered, and a speed reducing device (11) for reducing the speed of rotation of said winding roll (6) while said winding roll (6) is rotated in the cloth winding-up direction under the action of said coil spring (7).
