Abstract (en)
[origin: EP0059071A1] There is described a paving breaker (1) comprising a handle (10), a cylinder (20) and a front end (30) wherein the handle is attached to one end of the cylinder by means of spring pins (21) and wherein the other end of the cylinder is attached to the front end also by spring pins (32). A novel design of cylinder is also disclosed wherein the cylinder is formed of a rolled steel tube. There is described also a muffler for use with paving breakers, the muffler being formed by two identical parts.
