Abstract (en)
[origin: EP0059401A1] 1. Mounting unit for supporting shaped ceramic elements, more especially tiles, which are to be dried, which unit has support sections and a number of periodically recurrent successive support plates which respectively engage at different heights beneath areas or regions of tiles laid thereon, wherein the support sections (longitudinal section members 2) are parts of a closed frame, and wherein a substantially full-length base plate (1) is provided at an intermediate height of the frame, which plate comprises the support plates (7 to 11) which, on one side of the base plate, are adapted to a first tile shape and, on its second opposite side, are adapted to another tile shape different from the first.
