Abstract (en)
[origin: EP0059466A1] 1. Thermal insulating facade for existing buildings, with a layer (14) of insulating material applied to the outer wall (8) of the building, an outer layer (15) forming the exposed side of the facade, and an intermediate carrier layer fixed to the outer wall (8) by plugs (10), bolts (11), characterised in that said carrier layer is a regular undulated wire mesh (1) disposed between the layer (14) of insulating material and the outer layer (15), said outer layer (15) being formed by a single or multiple layer (12, 13) of insulating plaster and said wire mesh (1) in combination with the plugs (10) and the bolts (11) engaging the wire mesh (1) serving as an attachment for the layer (14) of the insulating material to the outer wall (8) on the one hand, and as a carrier for the plaster of the outer layer (15) on the other hand.
