Abstract (en)
[origin: EP0059566A1] Cover and strain relief assembly for use with known elongated electrical connectors to provide either a 90 DEG or 180 DEG cable exit from the connector is formed by three pieces including a yoke 16 that engages a mounting flange 14 of the connector 10 and a pair of mating panels 18, 20 which snap together engaging both the yoke 16 and the cable 12. The mating panels 18, 20 can be reversibly connected, with respect to the manner in which they engage the yoke 16 to yield 90 DEG or 180 DEG cable exiting from the connector 10. The panels 18, 20 can further be provided with adjustable cable strain relief means 22.
