Abstract (en)  
[origin: EP0060016A1] A lamp assembly comprises an electrically insulating hollow body (12), a plurality of bulbholders (16) and a plurality of spaced, electrically conductive elements (22), cut from an electrically conductive sheet (18). Each bulbholder 16 is provided with a contact blade (38) having a flat portion (42) extending parallel to and abutting said electrically conductive element (22). The flat portion (42) and the abutting part of the electrically conductive element (22) each having a formation whereby they are retained on the insulating body.
