Abstract (en)
[origin: EP0060409A1] 1. A surf-board consisting of several tubular pressure chambers of flexible material, essentially arranged in parallel to each other and in longitudinal direction, which are individually inflatable and placed in a common flexible envelope which is tensioned by the inflated tubes (1-4), characterized in that the tubes (1-4) connected with each other in longitudinal direction are plane supporting each other, and that the external tubes (1, 4) have a smaller diameter than the internal tubes (2, 3).
