Abstract (en)
[origin: EP0060584A1] Luminaire for a tubular discharge lamp having an elongate thin-walled housing (1) having at its end fittings (8, 9) for accommodating the lamp, the housing furthermore comprising at least an electric component for operating the lamp, for example an electric stabilisation ballast (14), the space limited by the housing (1) being filled with cured foamed plastics material (7), the wiring embedded in the foam having two parallel wires (10, 11) for each lamp to be accommodated, a first wire (11) being interrupted between connecting means (12, 13) of a component (14), said means (12, 13) being located on an imaginary line which coincides with the said wire (11).
