Abstract (en)

The invention relates to a base for the post (2) of a traffic sign. The base comprises several superposable elements (4), (13), (20) each of low unit weight. The central element (4) comprises means (8) of clamping the foot (1) of the post (2). Application: heavy and stable base that can easily be moved by hand, particularly for roads and worksites. <IMAGE>

Abstract (fr)

L'invention concerne un socle pour le poteau (2) d'un panneau de signalisation. Le socle comprend plusieurs éléments superposables (4), (13), (20) ayant chacun un poids unitaire réduit. L'élément central (4) comporte des moyens de verrouillage (8) pour le pied (1) du poteau (2). Application : socle lourd et stable, facilement manipulé à la main, notamment pour les routes et les chantiers.
