Abstract (en)
[origin: EP0062702A1] 1. A system for displaying characters on a screen of a display unit on which the characters can be displayed in a plurality of different colours and on which the characters, which are displayed in relatively dark colours ; are displayed so as to be made brighter relative to the characters which are displayed in relatively bright colours, characterised in that there is provided a control unit (SE) which when displaying the characters (AZ, GZ) emits control signals (S3), which trigger a brightening of the relatively dark colours (R, B), to the display unit (AE), and which control unit when displaying graphic patterns (GM) and/or multicoloured television pictures, blocks the transmission of the control signals (S3).
