Abstract (en)

A fluorescent lamp and a method of manufacturing a fluorescent lamp are disclosed. The fluorescent lamp (5) has a winding envelope (6) which is made by bending a straight glass tube (10) into a U-shape to form a first bent part (6a) and a pair of first leg parts (6b), followed by bending each of the leg parts of the pair of first leg parts into a second U-shape to form a pair of second bent parts (6c) and two pairs of second leg parts (6d). Electrodes (7) are provided at the ends of the winding envelope. A projection (8) is provided on the first bent part, a quantity of mercury and a quantity of rare gas having been introduced into the envelope.
