Abstract (en)
[origin: EP0063218A2] 1. Pantile having transversely raised convex middle region (M) and ventilation opening (1) arranged there, from the edge of which a collar (K) extends upwards, which is overlapped by a cover hood (4) with downward directed edge strip (5) but leaving an air passage slit (3), characterised in that the upper edges (2') of both transversely running collar sections (2) and the inside surfaces (4') of the cover hood (4) have curves which follow the transverse convex.
