Abstract (en)

[origin: EP0063235A2] 1. Procedure for packing of food under protective gas in synthetic material containers which are closed by separately conveyable lids (36, 37, 38) with tear-off tongue (40), in which process the packing steps are performed in the sequence of product filling and then flushing with protective gas and then lid application and then sealing of the lids, the flushing with protective gas is taking place so that the lid is affixed to the container edge at least in one place, one side of the lid is slightly lifted, and the protective gas (24, 42) is then blown in through the opening formed thereby, characterized thereby that the lid is lifted at the tear-off tongue.
