Abstract (en)
[origin: EP0063257A2] 1. An annular vat mixer having a mixer rotor, which is driven from below by means of a drive shaft, which is guided via a gearing through an inner space in the annular vat, and a drive motor, and which comprises at least one mixing implement which penetrates the annular vat, at least one of the mixing implements being rotatable and being driven by the drive shaft via a toothed gearing, which comprises a toothed wheel rim disposed on the gearing housing and a toothed wheel, characterised in that a vat inner wall (68) is provided, which extends as far as the underside (70) of the rotor (6), and an intermediate space (18) is provided between the gearing housing (16), the vat inner wall (68) and the underside (70), in which intermediate space (18) the toothed wheel rim (52) and the toothed wheel (60) for the mixing implement (30) are arranged.
