Abstract (en)
[origin: WO8203643A1] An electric iron (1a) is provided with an ironing plate (2a) which is exposed to a hot air mouth (4a) of an air dryer (3a). The ironing plate (2a) is connected by means of a connection device (8) to the air dryer (3a). This connection is readily dismountable. In an example of execution, a reflecting plate (42) is provided on top of the ironing plate (2a). This reflecting plate (42) has underneath of the mouth (23) of the air dryer (3) an opening (43) for the hot air stream (50). The hot air stream comes out through a slot (46) between the ironing plate (2a) and the reflecting plate (42) towards the edge (48) of the ironing plate (2a).
