Abstract (en)

1. Supporting device (1) for prospectuses and like flat advertising material, attachable at an essentially vertical wall or like fixing base (23) and offering several insertion pockets (10) for the storage of the prospectuses in a way leaving them visible at least with their upper portions, the pockets being arranged one below the other like scales and at the same distance from the fixing base and with their front and rear sides pointed obliquely upwards forming an acute angle with that base, the supporting device (1) consists of a basic element (2) to be mounted at a fixing base (23), which in its measurements is limited essentially to those of an insertion pocket (10), and of a number of mounted bodies (6), which, on their part, are essentially limited in their measurements to those of an insertion pocket (10) and are detachably linked together in a staggered and downward arrangement effecting that the basic element (2) forms the rear side of the insertion pocket (10) directly below it and that the front side of this pocket is formed by the mounted body (6) below it ; this arrangement forming the insertion pockets (10) then is continued downwards, the front panel of each mounted body (6) upwards always being the rear side, the one of the lower mounted body (6) the front side of the respective insertion pocket (10), the whole system is characterized by the fact that it provides a detachable connection of the mounted bodies (6) with each other as well as with the basic element (2).

Abstract (de)

Eine Haltevorrichtung (1) für Prospeckte u. dgl. Flachmaterial mit mehreren schuppenartig untereinander angeordneten, jeweils einen gleichen waagerechten Abstand von einer im wesentlichen senkrechten Wand, Strebe od. dgl. Befestigungsunterlage (23) einnehmenden Einstekktaschen (10) zur zumindest in ihren oberen Endbereichen sichtbaren Aufnahme der Prospekte umfaßt einen Grundkörper (2) und eine Mehrzahl von Aufsatzkörpern (6), die sämtlich in ihren Abmessungen denen einer Einstekktasche (10) entsprechen und miteinander mit senkrechtem Versatz derart lösbar verbindbar sind, daß sie gemeinsam die Einstekktaschen (10) bilden. Die Anordnung ist raumsparend und ermöglicht eine Anpassung an gegebene Raumverhältnisse und/oder an die Mengen und gegebenenfalls unterschiedlichen Arten des Prospekt- u. dgl. Flachmaterials.
