Abstract (en)
[origin: ES264947U] The bed of the disclosure includes a foam overlay mattress (1) and a mattress support (2) in the shape of a ladder, releasably connected together by at least a strap (6) the ends of which are brought down around rods (3) of the mattress structure in order to be hooked, under the overlay mattress, to lugs (5) upwardly protruding from the mattress structure, such straps being provided with hooking rings (8) for that purpose. The mattress structure is completed by pairs of short feet (9).
