Abstract (en)  
[origin: ES264948U] The play pen of the invention has a body including a peripheric frame formed of parallel side-members and extending between corner posts (4), each side-member including a rigid core which is covered by a flexible plastic tube extending beyond the core ends and fixed (at 9) to posts (4) in order to ensure a flexible connection between the latters and the various side-members. Each post advantageously includes a pair of damping elements (12) and (13) the floor (5) being floatingly fitted on the lower damping element 13.
