Abstract (en)
[origin: EP0064965A1] A lavatory arm support adapted to be stationarily mounted on a support such as a wall adjacent a lavatory comprises a wall attachment (10, 12) and, pivotally mounted (at 20) thereon, an arm support structure comprising, in a lowered position, an upper arm portion (2, 3), a lower arm portion (4) and portions (6, 23) connecting said arm portions. The arm support (1) is provided with a latching structure comprising latching recesses (13) in the wall attachment (12) and shiftable latches (14) movably mounted in a support element (15) at the upper arm portion (2), said latches (14) being controllable via a link structure (22, 16, 17) by means of sturdy operating handle (19), enabling even persons of reduced muscular strength to operate the arm support between the raised and lowered positions. The latching structure comprises a return spring (21) urging the latches (14) towards latching position.
