Abstract (en)

[origin: EP0065134A2] An arrangement of a series of fixedly arranged pictures (5) parallel to the driving path of a public-transport vehicle is disclosed, the picture surfaces of the pictures being turned towards the people in the vehicle passing by. In the arrangement according to the invention, the pictures (5) of the series are provided closely adjacent to one another and in front of each picture (5) there is a set (6) of lamellas (7) arranged at a distance from one another, the longitudinal extension of which runs approximately at right angles to the driving direction and which are arranged with their width at different angles to the picture surface in such way that their imaginary extensions meet along a fictitious strip (10) which runs in the interior of the vehicle passing by. The pictures (5) are provided with the lamellas (7) in such a way that, viewed from a viewing point moving parallel to the picture surface, an impression is generated of a moving film. <IMAGE>
