Abstract (en)

[origin: EP0066077A1] 1. Folding box (10) for loose goods, especially for liquids, with a somewhat tube-shaped folding casing (11) of cardboard or paperboard, having a foldable flap closing the bottom side and lid side (12, 13, 14, 15), in which is contained a substantially tube-shaped inner lining (16), consisting of a film-like material which can be folded on the bottom side and lid side and is closable by a sealed joint, on the lid side of which is sealed in an outlet connection (20) provided on one side with a closure part, characterised in that the outlet connection (20) is sealed into the sealed joint of the inner lining (16) and that the outlet connection (20) has on its outer surface (23) at least one wedge-shaped projection (24) which, filling a wedge-shaped transitional gap between lining film (18, 19) and outlet connection (20), projects with its free wedge edge (35) into the sealed joint (17).
