Abstract (en)

[origin: US4495852A] A weapons system including a mortar and a vehicle. The vehicle has a body including a side wall having a region constructed for receiving the mortar. A mounting device is connected with the vehicle for mounting the mortar for movement between a traveling position in which the mortar is positioned to travel with the vehicle and a firing position in which the mortar is positioned to fire a projectile. The traveling position is delimited by the region provided in the side wall for receiving the mortar and the firing position is located on the ground in the vicinity of the vehicle.
