Abstract (en)
[origin: EP0066302A2] 1. Floor-standing display rack made of folding material, with a container (1) for receiving and presenting articles, which is fastened by means of its bottom (8) on a foot (2) which has a polygonal section and which possesses walls hinged to one another by means of longitudinal folding lines, central bending lines (16, 16) being formed in two walls located opposite one another, in their longitudinal direction, in such a way that the foot (2) can be folded flat so as to rest closely against the container (1), characterised in that an adhesive tab (7, 20) is hinged on each of the top edges of the front wall and of the rear wall of the foot (2), these adhesive tabs being glued to the bottom (8) of the container (1) at a distance from one another, and in that one of the walls connected with the adhesive tabs (7, 20) is unconnected laterally in a region adjoining this adhesive tab in a downward direction and is hinged on this wall by a further folding line (23).
