Abstract (en)

[origin: ES8304451A1] A device for applying a coating to a submerged surface. This device comprises an applicator having a support plate and a tight deformable envelope provided on its outer face with bristles, springs being fixed to the inner face of the plate and exert a pressure on the inner face of the envelope. The applicator is connected to the rigid support by means of a group of articulated rods, thereof at least one is connected to the support by elastic means in order that the applicator is applied with an adequate pressure to the surface. Application to the painting of the hulls of ships.
