Abstract (en)
[origin: EP0066565A2] A body (1) having a profile in the form of tongs consists of two flat sections (11, 12) connected to each other by means of a folded rigid strip forming a spring (13), the inner face of one of the flat sections (12) carrying a block (2) of compressible material. The ends of the two flat sections have attachment means (3, 4) designed to hold the said ends of the flat sections close together so as to slightly compress a portion of the block of compressible material. The back of the body is provided with a tab (7) designed for fixing to a belt or to a shirt button. <IMAGE>
