Abstract (en)

[origin: WO8202399A1] Novel thermoplastic molding compositions comprising a polyester-carbonate polymer and graphite fibers. The compositions possess improved rigidity and heat distortion temperature properties with the addition of 0.5% to about 45% by weight of graphite fibers. In an example, a polyester-carbonate was prepared from bisphenol A, terephthalaloyl dichloride, isophthalaloyl dichloride and phosgene. Graphite fibers were added to the above polymer in the amount of 10% by weight.

Abstract (fr)

Nouvelles compositions de moulage thermoplastiques comprenant un polymere de polyester-carbonate et des fibres de graphite. Les compositions possedent des caracteristiques ameliorees de rigidite et de temperature de distorsion a la chaleur avec addition de 0,5% a 45% environ en poids de fibres de graphite. Dans un exemple, un polyester-carbonate a ete prepare a partir de bisphenol A, de bichlorure de terephtalyle, de bichlorure d'isophtalyle et du phosgene. Des fibres de graphite ont ete ajoutees au polymere decrit ci-dessus dans une quantite de 10% en poids.
