Abstract (en)

[origin: EP0067970A1] 1. Fastening device for fastening facade elements to the external wall (1) of building, in which flat connecting element (11), standing at an angle to the external wall (1) of the building and connected with the external wall (1) via a screw (3) or similar lies flat against a correspondingly angled flat mounting rib (16) of the facade element and is connectable with the mounting rib (16) by means of usual connecting means, characterised in that a fastening element (5) with two legs (7) is secured to the external wall (1) of the building by means of the screw (3) or similar, which legs are essentially arranged in one axis with the fixing point (3), and in that the flat connecting element (11) is connected with the two legs (7).
