Abstract (en)

A stack of tinplate sheets (100) on a pallet (101) is packaged by two U-shaped cardboard strips (103, 104) covering the sides, metal corner brackets (111, 112) and a top covering (110). To provide a stronger package and greater protection for the tinplate sheets, a further preformed cardboard cover (108) is applied to the top of the stack so as to extend also over the said U-shaped cardboard strips (103, 104) and, after the metal corner brackets (111, 112) and top covering (110) are applied, a first steel securing band (106) is applied transversely to the pallet joists (102) and a plurality of second steel securing bands (114) are applied parallel to the joists (102).
