Abstract (en)

A fire fighting system includes one or more fire extinguishers (10) which are associated with a protected area. The extinguisher (10) is mounted on a bracket (11) which includes a coupling member (15) for coupling the extinguisher to the conduit for carrying fire extinguishing fluid to an outlet (29). The extinguisher (10) can be activated automatically from a remote location by means of an actuating device (22) such as a Metron protractor. The extinguisher (10) can also be activated manually by means of a lever (30).
