Abstract (en)

[origin: US4474164A] Machine for stone blocks' sawing. The sawing machine includes a frame mounted in order to pivot around a horizontal axis (6) and wearing two saw blades (8) on each side of this frame, the cutting edge of the blades (8) having an arc shape which center coincides with this horizontal axis (6). Means are provided to animate the frame with an oscillating movement around this horizontal axis (6) and to have a forward movement horizontally of the stone blocks (23) in direction of the saw blades (8). The machine is used for cutting particularly hard stone blocks in slabs (FIG. 1).

Abstract (fr)

La machine de sciage comprend un châssis monté à pivotement autour d'un axe horizontal (6) et portant deux lames de scie (8) disposées de part et d'autre du châssis, le fil des lames de scie (8) ayant une forme en arc de cercle dont le centre coïncide avec le dit axe horizontal (6). Des moyens sont prévus pour animer le châssis d'un mouvement oscillant autour du dit axe horizontal (6) et pour faire avancer horizontalement des blocs de pierre (23) en direction des lames de scie (8).
