Abstract (en)

[origin: EP0069333A2] Aqueous textile-stiffening solutions are prepared using partial starch phosphate esters or alkali metal or ammonium salts thereof which, to improve the swellability and solubility in cold water and also the storability of concentrated stock solutions, contain water-soluble calcium salts in an amount of 0.01 - 0.5 g Ca<+><+> per 100 g of starch ester and preferably in addition urea in an amount of 2 - 12 g per 100 g of starch ester.
