Abstract (en)
[origin: EP0070988A2] 1. Storage system consisting of disposable plastic containers which are sealed by means of a cover after filling and possess, at least on two opposing sides, a projection (11) which extends forward beyond the actual container cross-section, and of a shelving unit (20) which is provided, on its mutually facing inner sides, with horizontal support surfaces (23) arranged in pairs at a distance one above another, and having a dimension of the disposable container (10, 22) in the region of the projection (11) which is such that the disposable container (10, 22) can be pushed into the shelving unit (20) by means of the projection (11) in the manner of a drawer, resting on the bearing surfaces (23), and is suspended in place by its projection (11), characterized in that the projection (11) is designed as an outwardly bent part area of the side walls at the opening edge or edges of the disposable container (10, 22) and in that the horizontal support surfaces (23) arranged in pairs on the mutually facing inner walls are arranged at the same height in each case.
