Abstract (en)
[origin: EP0071027A1] 1. Living-room skylight with a casing (13) provided with covering frame (21) and hinged or tilting window leaf (20) attached to the casing, with window panes (2) fitted in all-round profiled seal, characterized in that both the frame of the casing (13) and the frame of the window leaf (20) comprises a weatherproof, rubber-type elastic material with an at least U, E or double T-shaped profile with all-round internal grooves, formed by the profile, into which the window panes (2) or inner rigid frame profiles (7) can be inserted, and that the panes or profiles are surrounded by the elastic casing profile (1) at least partially with a form fit and join these parts to form an inherently rigid frame structure, sealed to prevent ingress of water from the outside.
