Abstract (en)
[origin: EP0071163A2] 1. Frame for the transport and storage of tubes (4), comprising a plurality of frame parts which are arranged one above the other and are made profiled on the sides facing the tubes for accommodating the latter, the respective top and bottom frame parts being adapted to be interconnected, characterised in that the frame parts (6, 8, 10, 12, 102, 122, 146, 176) are hollow section members and that the top and bottom frame parts (6, 8, 102, 122, 176) are adapted to be interconnected by means of at least one locking rod (22, 24, 120) which can be fitted into one of these frame parts (e.g. 8) and is mounted to be swivellable in the said part.
