Abstract (en)
A tumble drier comprising a drum for tumbling the articles of a laundry load whilst a stream of air is passed over said articles by means of a fan 5, the drier having a cabinet with an air outlet opening through which the air used is vented via an exhaust duct. The exhaust duct comprises an extensible convoluted hose 8 which is supported in a collar 9 defining the cabinet outlet opening, the full length of the hose 8 being capable of being stored in a longitudinally compressed state within said cabinet, and the collar 9 permitting any required length of hose to be withdrawn from the cabinet through the collar.
