Abstract (en)  
Trench cutter (16) arranged to be mounted on a prime mover (10) and to be pivoted laterally of the prime mover between a raised transport position and a lowered operative position. The arm (18) has mounted thereon a rotary cutter member (22) comprising face cutting blades (52) and invert cutting blades (54). By the use of the trench cutter of the present invention a trench is cut laterally of the prime mover as the latter moves forwardly.
