Abstract (en)
[origin: EP0072030A1] 1. A mounting for a pipe cleaner around which mounting a twisted chenille wire piece (12) set with textile thread or fiber pieces can be wound, said mounting consisting of a cylindrical supporting body (11) with at least one spiral groove (17a; 17b) located in the surface area thereof and having at least one end a means (15a; 15b; 18) for securing the chenille wire piece against contortion, characterized in that the supporting body (11) has a portion (11a) with a larger diameter (D) and an adjoining portion (11b) with a smaller diameter (d), the means for securing against contortion is formed by a radial or axial bore (15a; 15b) for receiving one end of the chenille wire piece (12) and by a catch (18) disposed in the area of the end face of the supporting body, and that the surface areas of the supporting body (11) are provided with knurls or the like.
