Abstract (en)
[origin: EP0073250A1] A safety device for a heat cooking device, e.g., an electric oven, an electronic range, etc. Provided on an operation panel (2) in front of a body (1) are: an electronic controller which includes a microcomputer (13) for controlling a heater, e.g., a microwave generator (31); and components forming a keyboard (10) as an input unit, such as components disposed at the front side to be operated from input keys, e.g., cooking keys (4), (5), etc. bonded to a conductive and metallic thin sheet (17) which is grounded through the body (1). Thus, it can prevent the occurrence of a dangerous state due to an abnormal heating operation caused by self-triggering due to an external noise, static electricity, etc.
