Abstract (en)

[origin: EP0073333A2] 1. Switch for an electrical fuse of a projectile adapted to break through a water surface between firing and detonation, with a spring-loaded (3) pressure receiver (2) at the frontal end of the projectile casing (1), the pressure receiver (2) opening or closing a contact (4), characterized in that the switch is changing his position by the change of the ram pressure on changes of speed of the projectile under water and on passing through the water surface.
