Abstract (en)

The strap hinge is produced so as to be equipped with means (17, 14, 13) making it possible, during closing, to lift the hinge (2) and fit closely into it a heel (17) located up the line between two jaws (13) adjacent to the bearing, whilst at the same time bringing the heel to bear against the vertical branch (4) of the bearing. It is used, for example, for the rear door of a lorry. <IMAGE>

Abstract (fr)

Ensemble palier-penture pour porte de conteneur ou pour porte de véhicule, par exemple pour porte arrière de camion. L'ensemble est réalisé de manière à être équipé de moyens (17, 14, 13) permettant, à la fermeture, de soulever la penture (2) et d'en encasturer étroitement un talon (17) situé à l'amont entre deux mors (13) attenants au palier, tout en amenant ledit talon en appui contre la branche verticale (4) du palier.
