Abstract (en)

[origin: WO8202864A1] Device characterized in that the frame or chassis (1) of the vehicle receives on a fixed point (17) directly or indirectly via a pivoting mounting the hinge of a suspension element (7) connecting a hinged parallelogram (20, 8, 9, 21) capable of oscillating on a hingeable fixed point (15) of one of its links (8) and also receives for its control on a fixed point located beyond the hinge of the suspension element (7) the parallelogram on a fixed articulated point of one of the links between, with or beyond its hinge axis by its extension.

Abstract (fr)

Dispositif caracterise en ce que le cadre ou chassis (1) du vehicule recoit en un point fixe (17) directement ou indirectement par le biais d'un montage pivotant l'articulation d'un element de suspension (7) reliant un parallelogramme articule et oscillable (20, 8, 9, 21) en un point fixe articulable (15) d'une de ses liaisons (8) et recoit egalement pour sa commande en un point fixe situe au-dela de l'articulation de l'element de suspension (7) le parallelogramme en un point fixe articule d'une des liaisons entre, avec ou au-dela de son axe d'articulation par son prolongement.
