Abstract (en)
[origin: WO8203001A1] The inflatable assembly with multiple uses particularly provided for open air life is characterized by an inflatable base element (1) with a plane body (7) and a protruding peripheral edge (12) associated with a covering element (2) with two slopes which may be completely inflated or embodied as an inflatable structure carrying an impervious fabric set in and welded on this frame, the covering element comprising thereon protruding inflatable rigidifying beadings (30). Application to the camping industry, more particularly itinerant camping, and water leisure.
